

SOLID TECH

Hybrid

Solid Tech's Hybrid comes from a long heritage of award winning rack engineering and features all the top state-of-the-art engineering qualities that you would expect.

The Hybrid's latest developments allow flexibility like never before. Starting for example with a 4-shelf vertical rack

you can easily reassemble with the focus on horizontal expansion such as a 2-shelf racks side by side. If needed later, you can build vertically again while keeping the horizontal foundation from earlier. With this type of flexibility there are endless of options to explore, meaning you

can design the optimum A/V rack and tweak according to any changes you wish to make without any loss of platform-stability.

Hybrid pillars and extrusion are available in silver, black or copper anodized aluminium.

Hybrid

Example designs using the four building blocks: Shelf-kit, and corner pillars in three different sizes

4-shelf-kit design example

3-shelf-kit + Large turntable design example

1-shelf-kit design example

9-shelf-kit design example

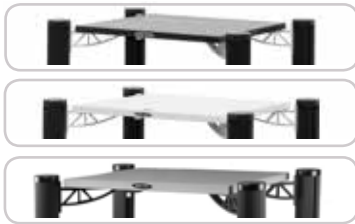

5-shelf-kit design example

5-shelf-kit design example

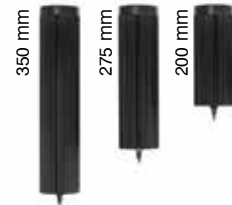

Hybrid building blocks: The Shelf-kit (shelves and extrusion) and corner pillars

Shelves in black, white or concrete

Extrusion in silver, copper or black aluminium

3 different pillar lengths in silver, copper or black

Hybrid options

Sideboard in black or white colour texture

Optional isolation system in silver, copper or black

Optional floor protectors in black or silver

Turn table shelf in black or white colour texture
