

SOLID TECH

Rack of Silence

The Rack of Silence design is extremely versatile and functional in order to guarantee minimum resonance and vibration. The Rack of Silence solutions are available in black or silver anodized aluminium, several wood trim veneers or colors. Rack of Silence comes almost complete pre-assembled, ensuring a quick and easy installation of the sound system. The Apparatus Support system is

made of extruded aluminum that is efficiently resonance controlled by the fact that both sides are coated with acrylic glass and insulated from the wooden strut with a cork lined underside, even the top is cork lined and offers the apparatus a scratch resistance as well as resonance-free surface to be placed on. On top of the apparatus support is also possible to have a shelf as in the picture

here below that also has a large turntable shelf supported by Solid Tech isolator, Discs of Silence.

Rack of Silence can be ordered in eight different sizes. The Reference line has integrated an efficient isolation system meanwhile the Regular line is without.

Rack of Silence variants and options

Rack of Silence Reference (with isolation integrated)

ROS 4 Ref. (900 mm)

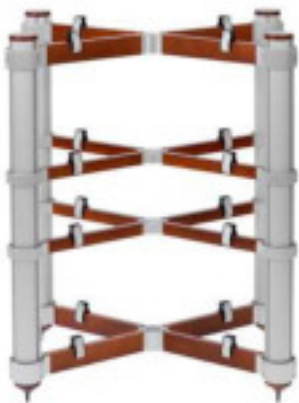

ROS 3 Ref. (600 mm)

ROS 1 Ref. (300 mm)

Rack of Silence Regular (without isolation)

ROS 4 Reg. (900 mm)

ROS 3 Reg. (600 mm)

ROS 2 Reg. (600 mm)

ROS 1 Reg. (300 mm)
