Hybrid Wood

Hybrid Wood is a new rack series within the Hybrid rack series. The new aluminum corner pillars are dressed in solid wood both in the front and on the side to give a more warm and home friendly touch. The solid wood is available in cherry, black oak, oak and walnut of highest possible quality. These new pillars are best fitted with the veneered shelves or concrete shelf. The pillars can be ordered with

or without integrated isolation system. The isolation is based on mechanical suspension system that very efficient cancel all non desired vibration that origin from the floor or from the equipment itself. In Hybrid Wood the isolation system is hidden in the pillar in order to be more elegant and discrete.

Standard pillar lengths are 200, 275 and 350mm. To the Hybrid Wood is

also available a turntable top shelf. These new turntables are made of a sandwich board that have been veneered in black oak, oak, walnut and cherry. In order to off load the rack from accessories it can also be equipped with a sideboard.

Hybrid Wood

Example designs using the four building blocks: Shelf-kit, and corner pillars in three different sizes
