

SOLID TECH

Hybrid Standard

Solid Techs Hybrid comes from a long heritage of award-winning rack engineering and features all the top state-of-the-art engineering qualities that you would expect.

The Hybrids latest developments allow flexibility like never before. Starting for example with a 4-shelf vertical rack you can easily reassemble with the focus on horizontal expansion such as a 2-shelf racks side by side. If needed later, you can build vertically again while keeping the horizontal

foundation from earlier. With this type of flexibility there are endless of options to explore, allowing you to design the optimum A/V rack and tweak according to any changes you wish to make without any loss of platform-stability. The user can freely determine the number of shelves to use depending on equipment sizes, as the shelves are fully adjustable along the corner-pillar lengths.

The optional suspension system is the same mechanical spring system as in

the stand alone isolator Disk of Silence. The isolation system will cancel out all non-desired vibrations origin from the floor or from the components within the rack. Hybrid Turntable Top Shelf and Hybrid Sideboard are available to customize the rack even further.

Hybrid pillars and extrusion are available in silver, black or copper anodized aluminum.

Hybrid Standard

Example designs using the four building blocks: Shelf-kit, and corner pillars in three different sizes

4-shelf-kit design example

3-shelf-kit and top shelf design example

1-shelf-kit design example

3-shelf-kit with Hybrid Full Length design example

9-shelf-kit design example

5-shelf-kit design example

5-shelf-kit design example

Hybrid building blocks: The Shelf-kit (shelves and extrusion) and corner pillars

Shelves in concrete, black, white, cherry, oak, black oak, walnut and carbon

Extrusion in silver, copper or black aluminum

Corner pillars in five different lengths

Corner pillars three different anodized aluminum and two top lid colors

Hybrid options

Sideboard in black, white, walnut, cherry, oak and black oak

Optional isolation system in silver, copper or black

Turn table shelf with bubble level in black or white colour

Bubble level is optional for the standard shelves

Floor Protector

Feet of Concrete

Spike Fixed Floor Protector

Hybrid features

Internal bracing to keep resonance low

Shelves are fully adjustable along the corner pillars
