

SOLID TECH

Hybrid Wood

Hybrid Wood is a further developed concept within the Hybrid rack series. New aluminum corner-pillars are dressed in solid wood, for a luxury appearance that blends in the home. Solid wood parts are available in cherry, black oak, oak and walnut of interior design quality. Preferably combined with matching veneer shelves or concrete shelves. The pillars can be ordered with or without

Integrated Isolation System. Just as in the original Hybrid and Disk of Silence, it's the same mechanical suspension spring system, that cancel out all non-desired vibrations, that origin through the floor or from the components within the rack. In Hybrid Wood the isolation system is hidden in the pillar in order to be more elegant and discrete. Hybrid Wood Turntable Top Shelf is also available.

The new Turntable Top Shelf is made of a unique sandwich board, specially developed for acoustic damping, with matching veneers. Additionally, the Hybrid Wood rack can also be equipped with the Hybrid Accessory Sideboard.

Standard pillar lengths are 200, 275 and 350mm.
