

# SOLID TECH

## Hybrid Standard

Solid Techs Hybrid comes from a long heritage of award-winning rack and features all the top state-of-the-art engineering qualities that you would expect. The Hybrids latest developments allow flexibility like never before. Starting for example with a 4-shelf vertical rack you can easily reassemble with the focus on horizontal expansion such as a two-shelf rack side by side. If needed later, you can build vertically again while keeping the horizontal foundation from earlier. With this type of flexibility there are endless of options to explore, allowing you to

design the optimum AV rack and tweak according to any changes you wish to make without any loss of platform-stability. The user can freely determine the number of shelves to use depending on equipment sizes, as the shelves are fully adjustable along the corner-pillar lengths.

There is an optional top shelf isolation system available that uses the same mechanical spring system used in the stand-alone isolator the Disk of Silence.

In order to isolate the modular shelves an Isolation Shelf is recommended

with an integrated suspension system that will individually decouple each shelf from vibrations.

Both isolation systems will cancel out all non-desired vibrations originated from the floor or from the components within the rack. Hybrid Turntable Top Shelf and Hybrid Sideboard are available to customize the rack even further. Hybrid pillars and extrusion are available in silver, black or copper anodized aluminum. The Shelves are available in a number of colors and veneers as well in concrete.

# Hybrid Standard

## Example designs

4-shelf-kit design

3-shelf-kit design

1-shelf-kit design

3-shelf-kit with Hybrid Full Length design

9-shelf-kit design

5-shelf-kit design

5-shelf-kit design

## Hybrid building blocks: The Shelf-kit (shelves and extrusion) and corner pillars

Shelves in concrete, black, white, cherry, oak, black oak, walnut

Extrusion in silver, copper or black aluminum

Corner pillars in five different lengths

Corner pillars in three different anodized aluminum and two top lid colors

## Hybrid options

Sideboard in black, white, walnut, cherry, oak and black oak

Optional isolation system in silver, copper or black

Top table with bubble level in walnut, cherry, oak and black oak

Cable Carrier in black or silver

Bubble level

Top table with bubble level in black or white colour

Isolation shelf in black or white bottom and top shelf in black, white, walnut, cherry, oak or black oak

## Hybrid features

Internal bracing to keep resonance low

Shelves are fully adjustable along the corner pillars

## Feet options

Feet of Concrete Floor Protectors

Spike Fixed Floor Protector
