## Hybrid Standard

The Hybrid rack system comes from a long heritage of award winning racks and features all the top state-of-the-art engineering qualities that you would expect. The Hybrids latest developments allow flexibility like never before. Starting for example with a 4-shelf vertical rack, you can easily reassemble with the focus on horizontal expansion such as a two-shelf rack side by side. If needed later, you can build vertically again while keeping the horizontal foundation from earlier. With this type of flexibility there are endless of options to explore, allowing you to

design the optimum AV rack and tweak according to any changes you wish to make without any loss of platform stability. The user can freely determine the number of shelves to use depending on equipment sizes, as the shelves are fully adjustable along the corner-pillar lengths.

The top shelf isolation system uses an efficient mechanical decoupling method to reduce any external or internal vibrations.

Two different isolation shelves are available, one for lighter loads and one for heavier loads.

Both the top isolation system and the isolation shelves will effectively cancel out all non-desired vibrations originated from the floor or from the equipment within the rack.

Hybrid Turntable Top Shelf and Hybrid Sideboard are available to customize the rack even further.

Hybrid pillars and extrusion are available in silver, black or copper anodized aluminum. The Shelves are available in a number of colors and veneers as well in concrete.

# Hybrid Standard

## Example designs

4-shelf-kit design

3-shelf-kit design with Isolation shelf-kit HD and top shelf

3-shelf-kit design with concrete shelves

1-shelf-kit design with shelf in oak

3-shelf-kit with Hybrid Full Length design, Isolation shelf-kit and Cable Carriers

9-shelf-kit design side-by-side

5-shelf-kit design side-by-side

5-shelf-kit design side-by-side

## Hybrid building blocks: The Shelf-kit (shelves and extrusion) and corner pillars

Shelves in concrete, black, white, cherry, oak, black oak, walnut

Extrusion in silver, copper or black aluminum

Corner pillars in five different lengths

Corner pillars in three different anodized aluminum and two top lid colors

## Hybrid options

Sideboard in black, white, walnut, cherry, oak and black oak

Optional isolation system in silver, copper or black

Veneered top table with bubble level in walnut, cherry, oak and black oak

Cable Carrier in black or silver

Bubble level

Top table for side-by-side configuration with bubble level in black or white colour

Isolation shelf in black or white bottom and top shelf in black, white, walnut, cherry, oak or black oak

Isolation shelf HD in black or white bottom and top shelf in black, white, walnut, cherry, oak or black oak

## Hybrid features

Internal bracing to keep resonance low

Shelves are fully adjustable along the corner pillars

## Feet options

Feet of Concrete Floor Protectors

Spike Fixed Floor Protector
