

SOLID TECH

Rack of Silence

Rack of Silence offers the optimal form and function to accommodate your equipment.

Its versatile and functional design guarantees minimum resonance and vibration.

The Apparatus Support system is made of extruded aluminum which controls efficiently the resonance as both inside and outside are coated with acrylic glass and insulated from the wooden strut with a cork lined underside. Moreover is the top cork

lined and offers a scratch resistance to the apparatus as well as resonance-free surface to be placed upon.

On top of the Apparatus Support, an optional table can be placed in order to achieve a more traditional rack look.

A top shelf made of a unique sandwich board, especially developed for acoustic damping, with matching veneers. Such top

shelf can be supported by Solid Tech isolator, Discs of Silence.

Rack of Silence Reference line has a unique integrated isolation system with revolutionary capability of decoupling both vertical and horizontal. The Rack of Silence series is available in black or silver anodized aluminum and there are several wood trim veneers as well as lacquers.

Rack of Silence variants and options

Rack of Silence Reference (with isolation integrated)

ROS 4 Ref. (900 mm)

ROS 3 Ref. (600 mm)

ROS 1 Ref. (300 mm)
